PROJECTS

- HR Analytics Dashboard** | *Data Analyst Python Training Project* 2026
- Designed and developed an end-to-end HR Analytics Dashboard to track and visualize key workforce metrics including employee records, attendance, and reporting summaries.
 - Utilized Python for back-end data processing and automation of HR data workflows, reducing manual effort.
 - Built interactive Power BI dashboards providing real-time visual insights into HR KPIs such as headcount trends and departmental reporting.
 - Leveraged Advanced Excel (PivotTables, VLOOKUP, conditional formatting) for data validation, cleaning, and structured reporting.
 - Demonstrated ability to translate raw HR data into clear, decision-ready visual reports for management.

TRAINING & COURSEWORK

- Python Development** | *Infiniti Design* Completed: Mar 2026
- Completed intensive training covering Python, SQL, HTML/CSS/JS, C, C++.
 - Gained hands-on experience in database design, query optimization, and back-end development relevant to data workflows.
 - Applied data manipulation and reporting techniques using Python and SQL across real-world project scenarios.
